

FIRMIC

The Operating System for AI-Native Companies

Slide 1

Cover

FIRMIC

The Operating System for AI-Native Companies

Launch a company in a day.

Equip it with business infrastructure and deploy an AI workforce from hour one.

Founder

Hussein Matar

Slide 2

The Problem

Starting and operating a company remains fragmented and operationally complex.

Founders and small teams must coordinate:

- Virtual offices
- Compliance
- Documents
- Mail handling
- Calls
- CRM systems
- Reporting
- Operations
- Administrative workflows

As a result, small teams spend critical time managing infrastructure instead of building products, serving customers, and growing revenue.

Slide 3

Existing Solutions

Current providers solve only one piece of the problem.

Regus Provides office infrastructure.

Servcorp Provides office infrastructure.

HubSpot Provides CRM.

Microsoft 365 Provides productivity tools.

Consultants Provide compliance support.

No platform unifies business infrastructure, operations, compliance, and AI workforce management into a single operating system.

Slide 4

Our Solution

Firmic is the Operating System for AI-Native Companies.

A single platform where businesses can:

1. Create a company
2. Rent a virtual office
3. Manage company documents
4. Manage operational tasks
5. Monitor compliance
6. Generate reports
7. Manage communications
8. Connect business integrations
9. Receive direct mail
10. Hire AI workforce

All from one centralized platform.

Slide 5

Product Demonstration

[Insert Dashboard Screenshot]

Firmic enables users to:

- Create and manage companies
- Deploy business infrastructure
- Coordinate operations
- Monitor compliance
- Generate reports
- Manage AI workforce

through one unified experience.

Slide 6

AI Workforce

[Insert Sonny AI Screenshot]

Sonny AI acts as the orchestration layer for business operations.

Future workforce includes:

- Receptionist AI
- Sales AI
- Support AI
- Executive Assistant AI
- Finance AI
- Legal AI
- Marketing AI
- HR AI
- Compliance AI
- Operations AI
- CRM AI
- Billing AI
- Mailroom AI
- Meeting Room AI
- Reporting AI

15 specialized AI employees coordinated through a single platform.

Slide 7

Compliance and Governance

[Insert Hermes Screenshot]

Hermes continuously monitors:

- Compliance readiness
- Company documents
- Regulatory requirements
- Risk exposure
- KYB readiness
- Operational compliance

Helping businesses stay compliant as they scale.

Slide 8

Why Now

Three major trends are converging:

1. AI agents are becoming capable digital workers.
2. Remote-first companies are growing globally.
3. Business infrastructure is becoming increasingly digital.

Tomorrow's companies will launch with AI employees from day one.

Firmic is designed for that future.

Slide 9

Market Opportunity

Global Business Services Market \$1 Trillion+

Virtual Office Market \$20 Billion+

Business Software Market \$600 Billion+

AI Software Market Rapidly expanding worldwide

Firmic sits at the intersection of all four markets.

Slide 10

Business Model

Recurring subscription revenue.

Starter Plan

Premium Plan

Enterprise Plan

Additional revenue streams:

- Virtual offices
 - AI workforce subscriptions
 - Compliance services
 - Meeting rooms
 - Mail handling
 - VoIP services
 - CRM services
 - Microsoft 365 services
-

Slide 11

Competitive Advantage

Traditional providers offer infrastructure.

Firmic offers infrastructure plus intelligence.

Infrastructure:

- Virtual offices
- Mail handling
- VoIP
- Meeting rooms

Intelligence:

- Sonny AI
- Hermes Compliance
- AI Workforce
- Business Reporting

Firmic transforms infrastructure into an operational platform.

Slide 12

Current Status

[Insert Company Control Center Screenshot]

MVP Completed.

Completed modules:

- Dashboard
- Virtual Offices
- Company Workspace
- Documents
- Tasks
- Messages
- Reports
- Integrations
- Sonny AI
- Hermes Compliance

Working backend APIs.

End-to-end operational workflow completed.

Slide 13

Roadmap

Phase 1 MVP Complete

Phase 2 Authentication Multi-Tenant Security 15 AI Workforce Agents

Phase 3 Production Launch

Phase 4 Enterprise Expansion

Phase 5 Global AI-Native Business Infrastructure Network

Slide 14

Vision

Every company will eventually operate with AI employees.

Firmic aims to become the operating system powering those businesses.

Just as Shopify became the operating system for internet commerce,

Firmic will become the operating system for AI-native companies.

Slide 15

Why Hub71

Hub71 offers the ideal environment for Firmic to scale.

Through strategic support, mentorship, ecosystem access, and enterprise partnerships, Hub71 can help accelerate the development of the next generation of AI-powered business infrastructure.

We believe the future company will launch with AI employees from day one.

Firmic is building that future.

Thank You
